## Finer Machines... Finest Constructions

HTC's flagship dust extractor, HTC 80 iD II has been given a thorough update on eight different points. Details that may seem small but which are important for the user both ergonomically and economically. HTC 80 iD II is a top class dust extractor for professional flooring contractors who demand only the best.

This new dust extractor will improve your efficiency with up to 15% compared to a traditional solution. The HTC 80 iD II is equipped with a high performance integrated pre-separator that removes up to 95% of the dust and increase filter lifetime.

The HTC 80 iD II can be used in various ways depending on your setup. For maximum efficiency and output we recommend a remote controlled grinder. If you use a traditional grinder without remote control you can still benefit from the double Longopac® or make use of the optional remote control to turn on & off the dust extractor from a distance.

### Improvements

- New "duck bill" valves
- Bypass valve for continuous operation
- Integrated pre-separator
- Easy access power plugs
- New hoses
- New locking mechanism
- Welded filter seams
- Filter cleaning valve improved
